## Finally

#### Where there is a will, there is a way

You might think doing business in Africa is difficult?

NO! even a small start up as we are can give much influence! You have seen what a startup with capital of 3 million yen (US\$28,500) can do.

Most of you are bigger companies than we are. You can give much more influence if you have a will.

## If you want to go farther in Africa, let's go faster together!

We arranged the beautiful African proverb:

If you want to go fast, go alone, if you want to go far, go together.
